Customer Journey Map

AI Learning Assistant

Project Title

AI Learning Assistant

Domain

Artificial Intelligence | Education Technology

1. Introduction

A Customer Journey Map is a visual representation of the steps a user follows while interacting with a product or service. It helps identify the user's goals, actions, emotions, pain points, and opportunities for improvement at each stage of the experience.

For this project, the customer journey focuses on how a student interacts with the AI Learning Assistant from the moment they access the application until they receive personalized study guidance.

2. Customer Persona

User Name: Rahul (Sample Student)

Age: 20 Years

Occupation: Engineering Student

Goal: To study effectively, reduce stress, and receive personalized academic guidance.

3. Customer Journey Stages

Stage	User Actions	User Feelings	Pain Points	AI Learning Assistant Response
Awareness	Learns about the application	Curious	Needs study support	Introduces AI-powered learning assistance
Login	Opens the application and enters study-related text	Hopeful	Doesn't know how to start	Provides a simple and user-friendly interface
Emotion Detection	Submits thoughts or questions	Nervous or stressed	Difficulty expressing emotions	Detects emotional state from text input
AI Guidance	Waits for recommendations	Expectant	Needs meaningful advice	Gemini AI generates personalized study guidance
Progress Tracking	Reviews previous interactions	Motivated	Wants to improve continuously	Dashboard displays emotion history and insights
Continued Learning	Uses the application regularly	Confident	Maintaining consistency	Provides continuous encouragement and learning support

4. User Goals

The user aims to:

- Improve concentration.
 - Reduce academic stress.
 - Receive personalized study suggestions.
 - Stay motivated throughout the learning process.
 - Track learning progress over time.
-

5. Pain Points

Students often experience:

- Exam anxiety.
 - Lack of motivation.
 - Confusion while studying.
 - Generic learning recommendations.
 - Difficulty managing study schedules.
-

6. Opportunities

The AI Learning Assistant improves the user experience by:

- Detecting emotions from text input.
 - Providing personalized AI-generated responses.
 - Encouraging students with motivational suggestions.
 - Maintaining interaction history.
 - Displaying analytical insights through a dashboard.
-

7. Expected Outcome

After using the application, students are expected to:

- Feel more confident in their studies.
- Receive personalized learning guidance.
- Stay motivated during preparation.
- Improve study habits.

- Enhance academic performance.
-

8. Conclusion

The Customer Journey Map demonstrates how the AI Learning Assistant supports students throughout their learning journey. By understanding user actions, emotions, and challenges at every stage, the application delivers personalized and emotionally aware learning assistance, resulting in a more engaging and effective educational experience.
