

Empathy Map

AI Learning Assistant

Project Title

AI Learning Assistant

Domain

Artificial Intelligence | Education Technology

1. Introduction

An Empathy Map is a Design Thinking tool used to understand the user's thoughts, feelings, behaviors, and challenges. It helps developers build solutions from the user's perspective rather than focusing only on technical aspects.

For our project, the primary users are students who experience emotional and academic challenges while learning.

2. Target User

Primary User:

- School Students
 - College Students
 - Competitive Exam Aspirants
 - Online Learners
-

3. User Persona

Name: Rahul (Sample Student)

Age: 20 Years

Occupation: Engineering Student

Goal:

To study effectively, score good marks, and stay motivated throughout the semester.

4. Empathy Map

THINKS

The student often thinks:

- "Will I complete the syllabus on time?"
 - "I'm forgetting everything I study."
 - "The exams are getting closer."
 - "I don't know where to begin."
 - "Others are studying better than me."
-

SEES

The student sees:

- Huge syllabus
 - Competitive classmates
 - Social media distractions
 - Numerous online learning platforms
 - Academic pressure from college
-

HEARS

The student hears:

- "Study harder."
- "Exams are approaching."
- "You need better grades."
- Advice from teachers

- Suggestions from parents and friends
-

SAYS

The student says:

- "I'm stressed."
 - "I can't focus."
 - "I need motivation."
 - "I don't understand this topic."
 - "I'm worried about my exams."
-

FEELS

The student feels:

- Stress
 - Anxiety
 - Confusion
 - Fear of failure
 - Lack of motivation
 - Pressure to perform well
-

5. Pain Points

Students face several challenges:

- Poor concentration
 - Exam stress
 - Lack of motivation
 - Information overload
 - No personalized guidance
 - Difficulty managing study time
-

6. User Needs

Students need:

- Personalized learning support
 - Emotional encouragement
 - Smart study recommendations
 - Better planning strategies
 - Continuous motivation
 - AI-powered academic assistance
-

7. How AI Learning Assistant Solves These Problems

Our proposed system helps students by:

- Detecting emotional state from text.
 - Providing personalized study guidance.
 - Motivating students using AI-generated responses.
 - Maintaining conversation history.
 - Displaying progress through analytics.
 - Making learning more engaging and interactive.
-

8. Expected User Experience

After using the AI Learning Assistant, students can:

- Feel more confident while studying.
 - Receive personalized learning advice.
 - Stay motivated during exam preparation.
 - Reduce stress through encouraging AI responses.
 - Improve study consistency and academic performance.
-

9. Conclusion

The Empathy Map helped us understand the emotional and academic challenges faced by students. By analyzing what users think, feel, hear, see, and say, we designed an AI-powered solution that not only provides educational guidance but also supports students emotionally, making the learning experience more personalized and effective.
