

Problem–Solution Fit

Project Title

AI Learning Assistant

Introduction

The Problem–Solution Fit document explains how the proposed solution effectively addresses the identified problem. The AI Learning Assistant is designed to understand students' emotional states and provide personalized learning guidance using Artificial Intelligence.

Identified Problem

Students often experience:

- Exam stress
- Anxiety
- Lack of motivation
- Difficulty concentrating
- Confusion while learning

Most online learning platforms provide the same content to every student without considering their emotional condition.

Proposed Solution

The AI Learning Assistant analyzes the student's text input, detects the emotional state, and generates personalized learning recommendations using Google Gemini AI.

Problem–Solution Mapping

Problem	Proposed Solution
Exam Stress	AI provides motivational study guidance
Anxiety	Personalized encouraging responses
Confusion	Clear explanations and study suggestions
Lack of Motivation	AI-generated motivational support
Generic Learning	Emotion-based personalized recommendations

Benefits

- Personalized learning
 - Better student engagement
 - AI-powered assistance
 - Emotion-aware recommendations
 - Improved learning efficiency
-

Conclusion

The proposed AI Learning Assistant effectively bridges the gap between traditional learning systems and personalized educational support by incorporating emotional awareness into the learning process.
