

Functional Features Included

Project Title

AI Learning Assistant

Introduction

The AI Learning Assistant includes several functional features that improve the learning experience through Artificial Intelligence.

Functional Features

Feature 1

Student Text Input

Students can enter study-related questions or thoughts.

Feature 2

Emotion Detection

Detects:

- Happy
- Sad
- Angry
- Stressed
- Anxious
- Motivated
- Confused
- Neutral

Feature 3

AI Response Generation

Uses Google Gemini AI to generate personalized learning guidance.

Feature 4

Personalized Recommendations

Provides recommendations based on the detected emotional state.

Feature 5

Interaction Logging

Stores:

- Timestamp
 - User Input
 - Emotion
 - Confidence
 - AI Response
-

Feature 6

Dashboard Analytics

Displays:

- Emotion Distribution
 - Interaction History
 - Learning Trends
-

Feature 7

User-Friendly Interface

Interactive web application built using Streamlit.

Summary of Features

Feature	Status
User Input	✔ Implemented
Emotion Detection	✔ Implemented
Gemini AI Integration	✔ Implemented
Personalized Guidance	✔ Implemented
Interaction Logging	✔ Implemented
Dashboard Analytics	✔ Implemented
User Interface	✔ Implemented

Benefits

- AI-powered learning
- Personalized recommendations
- Better engagement
- Easy to use
- Scalable design

Conclusion

The AI Learning Assistant successfully implements all the planned functional features, providing an intelligent, user-friendly, and personalized learning platform.
